

***Consistently providing exceptional service, we are experts in  
Solar and Electrical Solutions***

**Global  
Protection  
Systems**

clean energy and water solutions

**“Our mission is to offer the highest quality products and customer service while saving clients’ money and making a positive contribution to our environment”**

## OUR COMPANY

At the heart of the company's philosophy is a deep appreciation for our environment and offering efficient electrical, solar, water and energy solutions to make a real difference to our client's pockets and our planet.

We provide economic long term energy solutions for commercial and residential customers while ensuring only the highest quality products are used and offer exceptional customer service. Our transparency is unmatched.

Global Protection Systems has over 40 years' combined experience in the construction and solar industry.

## PEOPLE

Offering exceptional customer service is very important to Global Protection Systems, our management and employees are expected to:

- Ensure the highest quality of work is delivered
- Ensure the jobsite is left neat and tidy
- Ensure Workplace Health & Safety procedures are followed
- Ensure they always dress neat and presentable in their uniforms
- Ensure they always behave appropriately while representing the company

All of our staff are fully trained and accredited to the strictest requirements in quality and safety. We encourage them to continually improve their skills by offering in-house and external training and development programs.

## ACCREDITATIONS

- WA Electrical Contractors License No. EC00964
- NT Electrical Contractors License No. C337
- CEC Grid Connect & Install No. A7476182
- Stand Alone Design & Install No. A7476182
- ARC Split System Installation & Decommissioning Licence No. L127695
- Refrigerant Trading Authorisation AU40447

## CAPABILITIES

Global Protection Systems is a well-established industry leader providing the follow services to residential, commercial and industrial clients:

- Design & Installation of Grid Connect and Off Grid Solar Hybrid Energy Systems
- Large scale Irrigation Pumping Systems with Off Grid Solar- Diesel Hybrid Power
- Electrical Consulting
- Efficient Lighting Designs
- Air conditioning Installation
- Smoke Alarms
- RCD's and Safety Switches
- Electrical Maintenance, Fault Finding & Repairs
- Automated Businesses & Homes
- Data & Communication Design & Cabling
- Temporary/ permanent Power for Mining and Construction Sites
- Testing & Tagging
- Medium-heavy industry electrical installations
- Solar Hot Water Systems

We specialise in design and installation of Grid Connect and Off Grid Solar Hybrid Energy Systems utilising the latest technology such as battery storage and generation management for limited or sensitive assets. What sets us apart from the rest is that we are not just sales people trying to sell you the biggest system that fits on your roof. We recognise that every job is different in relation to how much power the client consumes, when they consume it, the value of the feed in tariff, if any, and current rebates.

To gather this information we install a data logger on the building to monitor the power, from there our qualified staff analyse the data and design a specific system to suit which guarantees best payback period for your investment.

**Global Protection Systems offer a 6 year installation warranty!**

## **MANAGEMENT SYSTEMS**

### **Workplace Health & Safety Management**

A safe and healthy work environment is important to Global Protection Systems, we are committed to ensuring a safe work place for its employees, sub-contractors and the public.

To date we have had no incidents at any workplace, we have achieved this by:

- Planning, implementing and continually reviewing a comprehensive Occupational Health & Safety Plan.
- Staff inductions and reviewing the plan during Tool Box meetings.
- Encouraging employees to report any unsafe practises or conditions that become apparent.

Safety audits/inspections are conducted at workplaces by management to ensure these procedures are being followed.

### **Environmental Management**

Global Protection Systems is committed to minimising the impact it has on the environment. Procedures are put in place to ensure the environment is protected and staff are informed and trained on these procedures during induction and toolbox meetings.

### **Quality Management**

Global Protection Systems prides itself on the exceptional service it provides and the quality products it supplies. To ensure this high standard a Management plan has been put in place in conjunction with the OH&S plan for staff and management to follow.

## **FINANCE**

We have finance options available through West Coast Leasing & Finance Pty Ltd.

West Coast Leasing & Finance was established in 1982 and is now proud to be ranked among the top finance broking houses in Western Australia. Their team of exceptionally experienced consultants are dedicated to providing the highest standard of service.

## RECENT EXPERIENCE

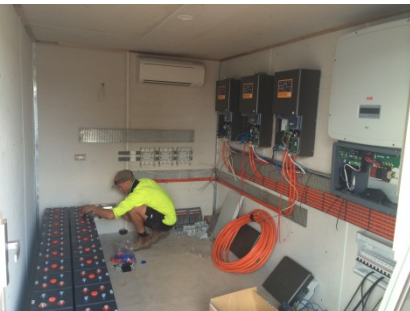

### Wongowol Station, WA

- Supply and installation of a 15.5kW Off Grid Solar Hybrid Energy Systems complete with battery room built in house by Global Protection Systems.

### SOLARZONE (WA), WA

- Supply and installation of a 30kW Grid Connect Solar System complete with Generation Management system.

### West Coast Finance & Leasing, WA

- Supply & installation of a 10.64kW Grid Connect System.

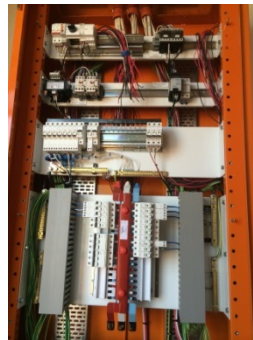

## Harvey Water, WA

- Supply & installation of a 12.32kW Grid Connect System.

## Yandeyarra Health Clinic, WA

- Site main switchboards & distribution boards
- Underground Services
- Alarm, Duress & CCTV Systems
- Emergency & Exit Lighting
- Backup Generators
- Communication & Data systems
- Air Conditioning
- General electrical (lights, GPO's, fans, etc)

## Eucla Police Station, WA

- Site main switchboards & distribution boards
- Underground Services
- Alarm, Duress & CCTV Systems
- Security to Holding Cells
- Emergency & Exit Lighting
- Wiring for Future Backup Generators
- Communication & Data systems
- Air Conditioning
- General electrical (lights, GPO's, fans, etc)

## Karijini Eco Resort, WA

- Underground services
- Connect & Fit off Staff & Student Accommodation
- Connect & Fit off Ablutions including installation of Solar hot water systems
- Installation of solar.

## TESTIMONIALS

*In the last twelve months we have used the services of Global Protection Systems on two separate occasions, first on our holiday house on the canals in Mandurah, which was virtually re-built from scratch and then on our Commercial Office premises in East Victoria Park. Both jobs were not small by any means, particularly the two story commercial office in East Vic Park. On both occasions we decided to go with Global Protection Systems because, right from the beginning of the negotiations they were extremely professional in their presentation and very detailed on the reason for using the equipment recommended and the benefits that would come with it. At no stage did we feel that we were being taken for fools and any question was explained in total detail.*

*Both jobs were completed within the time parameters as promised, the jobs were completed with minimal fuss or interference on our normal activities and the work was of excellent quality. We can honestly say that the dealings from beginning to end were of the highest possible standard and we are extremely satisfied with the end product on both properties and the results have exceeded expectations. In fact we are currently in negotiation with them for another installation for a new system on our family home in Attadale.*

*We have no hesitation in recommending Global Protection Systems to any potential client without the slightest hesitation; they stood out from the rest that we considered.*

Hans Bayer  
Managing Director  
West Coast Leasing & Finance

*We found Global Protection Systems to be thoroughly reliable. The work was completed on time, on budget and performance of the system has been very good. Moreover we were impressed by the manner in which the team worked on-site, very aware of safety, very courteous, well supervised and the job was clean and tidy. Very satisfied with the service provided thanks.*

Stephen Cook  
Operations Manager  
Harvey Water

*We have used GPS on several occasions and have found them to be professional and efficient in their approach to solar and other home electrical services. We would gladly use them again and have and will recommend them to anyone looking for a job done right.*

Marco, WA

*Thank you Ivi for the great job you did installing our air conditioning. Your price was competitive and we were impressed with how approachable and professional you were. It is great to see a tradesman who takes pride in his work and is passionate about the industry he works in. We would definitely recommend your business to others.*

Emily, WA

*I can thoroughly recommend GPS. They responded rapidly to my request for a quote, installed my system in a timely and professional manner, and have provided first-class on-going support and assistance.*

*Their knowledge of the product is extensive and thorough, leaving no question unanswered.*

*I am only too happy to recommend them to anybody considering the installation of a PV system.*

Pat - Wellard

*Jody and Ivi for showing our family the sunlight!*

*You have switched us on to a much greener future. Our power bills have now been reversed. Rather than getting a \$300-400 dollar bill every few months we're receiving that amount as credit!*

*Your correspondence and attention to detail has been wonderful and it's appreciated. We were originally concerned that the system we wanted could not be installed on our roof as two other installers said it could not be done. You guys made it look easy on the day.*

*Installing solar it created an awareness of power. GPS has helped changed the culture in our family to switching off lights and reducing our greenhouse footprint. Even the children have jumped on the bandwagon in our household. They have started switching off lights behind parents and turning off TV's and computers. I never thought I would see that occur.*

*It's nice to be able to know that we've reduced our greenhouse emissions and helped educate our family, while at the same time saving money!*

*Thanks Ivi and Jody.*

Greg, WA

## **FUTURE PROSPECT**

Global Protection Systems are interested in expanding the solar side of the business to include large residential or commercial developments that are 100% self-sufficient and off the grid with battery back-up systems.
